A Memorandum with training centre ABF shows the way for TRAIN-To-NZEB activities in the Czech Republic.

The Department of Civil Engineering and Architecture at Ege University has completed the development of the TRAIN-To-NZEB training centre in Turkey.

A paragon of a training programme: TRAIN-To-NZEB Remezov is ready for the challenges ahead

The Department of Civil Engineering and Architecture at Ege University completes the development of the TRAIN-To-NZEB training centre in Turkey. The centre will offer a wide range of courses and hands-on training on energy efficient building solutions, including NZEB (Nearly Zero Energy Buildings). The training centre is expected to attract participants from around the world, aiming to contribute to the global energy efficiency efforts and the transition towards sustainable building practices.

Local and international business partners back up the Ukrainian BKH

The 8th EU Exchange Meeting under the BUILD UP Skills initiative took place on 2 June 2016 in Napoca, EvoHouse. As a result 2 Memorandum of Understanding were signed and 5 more are in preparation. The meeting was aimed at strengthening the cooperation between various stakeholders involved in the field of training and education, focusing on energy efficiency in buildings.

Highlights from the ground

The first dedicated Romanian Network of Energy Efficiency (RENEX) was appointed by the Romanian Joint Programme on Energy Efficiency (RJPEE), a project supported by the European Union and managed by the European Energy Agency (EEA). The network aims to foster the exchange of best practices and knowledge sharing among Romanian professionals and stakeholders involved in the field of energy efficiency.

The Department of Civil Engineering at Ege University completes the development of the TRAIN-To-NZEB training centre. The centre is expected to host renovation leaders from across Europe at a two-day Leaders' Summit, focusing on NZEB training and demonstration activities.
